ABSTRACT:
The global burden of diseases is altering from infectious diseases to the non-communicable diseases, and now becoming the chief cause of the death in all over the world. There are many non-communicable diseases among of them obesity (Sthoulya) are tremendously increasing in our society due to the change in the diet pattern, life style, and environmental conditions. Sedentary habits and lack of exercise are also the main reasons behind the increased incidence of Obesity. Obesity can leads to many diseases like Diabetes, Cardiovascular disease and Arthritis. Obesity reduces the average life span and decreases the quality of life. Hence, prevention of Obesity during its starting stage should be considered a priority for overcome the risk of Diabetes, Cardiovascular, Arthritis and other serious diseases. In text of Ayurveda, there are a number of drugs likes Gugglu, medicinal preparations, Pathya Apathya, Dinachrya and diverse techniques of Yoga which have wonderful preventive and curative effect on obesity.

Keywords: Non communicable disease, Sthoulya, Obesity, Pathya- Apathya, Ayurveda.

INTRODUCTION: Due to change in life style, faulty diet pattern and decrease interest in the exercise the incidence of obesity increases day by day in our society. Overweight and Obesity are the 5th leading risk of global deaths worldwide, Obesity has more then doubled since 1980. In 2008, more than 1.4 billion adults 20 years and older, where overweight of those 200 million man and nearly 300 women where obese. In 2012 more than 40 million children under 5 year of age where overweight one considered a high-income country problem. Overweight and obesity are now rising in low and middle income countries, particularly in urban setting. Close to 30 million overweight children are leaving in developing and 10 million in developed countries. In 2012, more than 40 million children under 5 years of age were overweight. Close to 30 million overweight children are leaving in developing and 10 million in developed countries. As obesity is a key risk factor in natural history of other chronic and non communci- cable disease, the typical time sequence of emergency of chronic disease following the increased prevalence of Obesity is important in public health planning. The first adverse effect of Obesity to emerge in population in transition are hypertension, hyperlipidaemia.
and glucose intolerance, while coronary heart disease and the long term complication of Diabetes such as renal failure. \(^1\) Changes in diet pattern, lifestyle and lack of physical exercise has increase the incidence of Obesity in the society. Ayurveda is known for serving the society from the past time. Prevention and cure of Ayurveda is exactly applicable on the Obesity. In the text of Ayurveda there are many drugs, medicine preparation, Yoga, Pathya-Apathya are described which have good result in the prevention and cure of obesity.

**AIMS AND OBJECTIVE:**
- To assessment the role of Ayurveda in Obesity.
- To assessment the Ayurvedic literature in useful life style disorder.

**MATERIAL AND METHODS:**
Different Ayurvedic classical book, research paper and journals were referred to fulfill this part, its comprise of subsection dealing with prevention and management of Obesity in Ayurveda.

**Obesity:**
It is a clinical condition in which there is an excessive amount of body fat. The Framingham study demonstrated that 20% excess over desirable weight should be considered obesity as this excess weight imparts a health risk.\(^2\)

**Quantifying obesity with body mass index**\(^3\)

According the symptoms of Obesity it can be correlate with Sthoulya in Ayurveda. Achrya Charcka described Sthoulya in eight despicable in Sutrasthan chapter-21.

In the context of body, eight persons are despicable such as- overtall, overshort, overhairy, hairless, overblack, overfair, overobese, overlean. The person is called as over-obese who, due to excessive increase of fats & muscles, has pendulous, abdomen & breasts & suffers from deficient metabolism & energy.\(^4\)

**Eight defects of over-obese (Sthoulya)**\(^4\)

| Shortening of life-span     | Difficulty in sexual intercourse  |
| Hampered movements         | Debility                           |
|                            | Foul smell                         |
|                            | Over sweating                      |
|                            | Too much hunger                    |
|                            | Excessive thirst                   |
Etiology of Obesity (Sthoulya)

Pathogenesis of Obesity

Consumption of various Nidan seven such as guru, Sheeta, Snigdha, Madhuradi Kaphavardhaka along with lack of exercise and sedentary life style result in excessive nourishment of medas while other bodily element are deprived of nourishment resulting in Sthoulya.

```
Nidan Seven

Formation of Aama Rasa

Mada Dhatu Ki Aativaradhi

Sthoulya

Sharatavrodh due to Meda Dhatu

Meda Dhatu Vrydhi

Other Dhatu Shaya

Vata ki Aativraydhi

Vraydha Vata ka Kosth me Parvesh

Jatharagani ki Aativeraydhi

Punh-Punh Aahar Seven Ki Icha and Ahar ka Shigr Pachana

Regular Medadhatu Vrydhi

Formation of Aama Rasa Again

Meda Dhatu Vrydhi

Shothyla Roga
```
Symptoms Of Sthoulya [10]
1. Ati Trishna [Excessive thirst]
2. Sharamjanya Swasa [Breathlessness on mild exertion]
3. Aati Nindra [Excessive sleep]
4. Karya Dorblyta [Difficulty to perform heavy work]
5. Jadyatha [Stuggishness]
6. Aalapaayu [Short life span]
7. Aalaphala [Decreased bony strength]
8. Uathashahani [Inertness]
9. Sharir Durgandhta [Foul odour of the body]
10. Gadgadtava [Unclear voice]
11. Sudha vrydhi [Excessive hunger]
12. Ati Shevida [Excessive Sweating]

We can prevent Sthoulya by the preventive measures of the Ayurveda.
1. Nidan parivargana
2. Use of healthy food
3. Regular excercise
4. Chintan ,Dhyana are also effective on obesity.
5. Rasanya
   a) Guggulu Rasanya
   b) Loha rasanyaya
   c) Aamalki Rasanya
6. Yoga
   a) Surya Namashkara
   b) Myurasana
   c) Shrshrasana

Treatment of Obesity As per Ayurveda[11]
Sansshaman therphy [Chiktsa]
Rasa/ Bhasama
a) Parad Bhasama
b) Trimurti Rasa
c) Vadaraagni Rasa Churna

Pathya-Apathya[12]

Some ayurvedic studies which shows the effect of Ayurvedic drugs in management of obesity:[13]

1. **Vacha**: The root and rhizomes of acorus calamus, family Acorus, are useful for weight loss and reducing LDL, cholesterol, triglycerides and increased the concentration of HDL. Animal studies, alcoholic or aqueous extracts of calamus roots and rhizomes, support a possible antihyperlipidemic action.

2. **Kutki**: The root of Kutki is the source of Scrophulariaceae, is the active ingredient. Kutki improves gallbladder secretions, thus aiding in the digestion & metabolism of fats. In a study of hyperlipaemic mice on a high diet, daily doses of water extract of Kutki significantly reduced total cholesterols, triglycerides, & LDL levels after 12 weeks.

3. **Gurmer**: The anti-obesity effects of the leaves of Gurmar were investigated in Wister rats fed with high fat diets. The saponins-rich aqueous exact administered to Wister rats, suppressed increases in body weight, organs weight, & plasma lipids. Gurmer can be used to treat obesity as well as alter lipid & glucose metabolism.

4. **Palash**: the phytochemical analysis showed that major chemical constituents of Palash were sterols, polyphenols, flavonoids, ascorbic acid and saponins are useful in treatment of obesity., phytosterols have beneficial effect on hyperlipidaemia, and polyphenols, flavonoids have potentials antioxidant properties.

5. **Mustak**: The tubers of Mustak are commonly known as Nut Grass, Cyperine is the active ingredient, working as a hypotensive agent, anti-inflammatory & diuretics, as well as reducing fat in body. It helps clearing the blocked channels. An experimental study was performed on Rats shows Cyperus Rotundus stopped weight gain & in vitro, stimulated lipolysis in 3T3F442 adipocytes.

**DISCUSSION**: The incidence of Obesity is increasing all over the world due to faulty diet pattern, lack of physical exercise. Obesity is the very common risk factor for the cardiovascular disease and Diabetic Balance diet plan and lifestyle can play a good role in the prevention and cure of Obesity. In the text of Ayurveda *Pathya Aahar-Vihara*, various types of Yoga, Rasayana, Dincharya, RitucharyaRarticharya are described which have good role in the prevention and management of Obesity. Different ayurvedic studies has been showed that drugs have effective role in obesity. If someone adopt the diet pattern, life style according to the Ayurveda it can be helpful in the decrease the incidence of Obesity. In text of Ayurveda there are number of drugs, formulation like *vati, churana* etc are described which have very effective result on the Obesity as mentioned above in details.
CONCLUSION: It seems that we need to reassess entire lifestyle if we want to prevent and manage obesity. In *Ayurveda Ahara, Vihara, Dincharya, Ritucharya, Yoga, Rasayana* are described which have good role in prevention & cure of the obesity. The prevention and management of obesity can be done successfully in *Ayurveda*. Moreover *Ayurvedic* treatments are safe & affordable by everyone.
