ABSTRACT
Skin is a vital organ of the human body. It protects internal organs and regulates the temperature along with maintaining colour, complexion and luster of the body. Since ancient times healthy skin used to be a prime factor for which various scientific treatments and methods are described in Ayurveda. Therefore due to loss in skin texture or due to various skin disorders, life becomes miserable because of social and psychological stigma attached to it. In Kerala the traditional formulations that are being used in various skin disorders have been referred mostly from Ashtang Hridayam & Sahasrayogam. The Paper deals with the list of different traditional Keraleeyan formulations that can play as preventive & therapeutic measures in skin disorders.

Keywords: Skin Disorders, Kushta, Keraleeyan Formulations

INTRODUCTION: Skin is an organ of complex physiology and any manifestation in skin should be explored in terms of general physical and mental health and also on the basis of the status of rasa and rakta dhatus, the physical and functional state of which is more often reflected through the skin.

In today’s era skin health has been given prime importance. Climatic changes, improper diet and lifestyle, excessive and improper use of cosmetics and various similar factors results in loss of skin texture, colour and complexion. We can enlist following causative factors of Skin disorders as mentioned in Charak Samhita Kushtha Chikitsa Adhyaya (1):

- Incompitable Food,Liquids,Unctous & heavy food along with diet consisting of salty,sour,pungent,alkaline, fatty, hot & uncooked articles, Moist/dried things, Meat of aquatic & marshy animals along with use of excessively new cereals,curd,fish,salt & sour items, Indulge in eating black gram, horse gram, raddish, rice flour, sesamum, milk & jaggery, oil cakes, nispava & other leguminous vegetables, Eating during Indigestion & also when previous meal is not properly digested, Complication of Panchakarma/Improper Panchakarma, Not performing Panchakarma Therapy, Regular Day Sleep, Sexual intercourse during indigestion/Excessive Sexual intercourse , Suppression of natural urges

Ayurveda denotes all skin diseases in general as ‘Kushta’. However we find many skin disorders mentiond elsewhere eg.in Kshudrarog (2) like Arunshika, Kacchapika, Visphot, Kaksha, Mukhadushika etc. not being mentioned in kushtha. Kushta is considered as “Deergha Roganam” (3) by Acharya Charak, it means it will take more time to cure and Vagbhata has indicated repeated Panchakarma procedures to get complete cure (4).
Nevertheless present paper deals with the list of different traditional Keraleeyan formulations that can play as preventive & therapeutic measures in skin disorders. These formulations are referred mostly from Sahasrayogam and Ashtang Hridayam which makes an integral part of Keraleeyan treatment modality. These medicines are in the form of Choornam, Avaleha, Kashayam, Asavarishtam, Gulika, Ghrutam, Thailam and Lepam. Appropriate use of these medicines along with purificatory measures can result in speedy recovery of the patient.

AIMS AND OBJECTIVES:
There are so many formulations available in different classical texts for different skin disorders. Brihadtrayi Charaka, Sushruta and Vagbhata mainly incorporate Kashthaushadhis for the treatment purpose. But later on Laghutrayi especially Sharangdhar and Bhavprakasha and succeeding Sangrahakaras have included Rasaushadhis prepared from metals and minerals for speedy recovery of skin disorders. As already narrated Kushtha (Skin Disorders) are considered as Deergha Roganam in nature, hence prolong treatment is required to correct the deranged dosha-dushya samurcchana. So just by adapting the basic principles of Ayurveda, the focus of study was confined to enlist the formulations of Kerala effective in Skin Disorders which are rarely known and practiced in other parts of India.

MATERIALS AND METHODS:
In Kerala the traditional formulations that are being used in various skin disorders have been referred mostly from Ashtang Hridayam & Sahasrayogam. Hence a literary review of both the texts was carried out to trace such formulations having specific mention of utility in skin disorders in their phalashrutis. Also their therapeutic effect was observed in clinical practice as well.

| Table.1 List of Different Formulations: |

**A) CHOORNAM**

<table>
<thead>

<td>Prabal Vatavyadhi, Sandi, Asthi, Majjagata Kushtha, Nadivrana, Arbuda, Bhagandar (Rheumatic &amp; Rheumatoid Diseases, Skin Diseases involving Bone, Bone Marrow &amp; Joints, Tumours, Fistula, Chronic Ulcers, Neurodermatoses)</td>
</tr>
<tr>
<td>2.</td>
<td>Patoladi Ghurutam (20)</td>
<td>Patol, Nimba, Kutaki, Darvi, Khas, Triphala, Vasa, Dhamsa, Parpataka</td>
<td>Nasa, Karna, Mukha Roga, Shukra, Timir, Naktandhya, Kushtha, Vidharadi, Visarpa (ENT &amp; Ophthalmic Disorders like Cataract, Night Blindness, Refractive Errors, Skin Disorders, Erysipelas)</td>
</tr>
</tbody>
</table>

### G) THAILAM

<table>
<thead>
<tr>
<th>Sr. No.</th>
<th>Thailam</th>
<th>Contents</th>
<th>Indications</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>Chembaruthyadi Keram (21)</td>
<td>Japa, Bilwa, Paranti, Krishna Tulsi, Bhumyamalaki, Neelini, Jeeraka dwaya,</td>
<td>Twak Vikar, Kandu, Balvisarpa (Skin Disease, Itching, Dandruff, Carbuncle, Eczema of Children)</td>
</tr>
<tr>
<td>2.</td>
<td>Dhurdhurpatradi Thailam (22)</td>
<td>Dhatura Patra Swarasa, Dhatura Beeja Kalka, Thailam</td>
<td>Shirakandu, Khalitya (Dandruff &amp; other Fungal Infestations of Scalp)</td>
</tr>
</tbody>
</table>
### 3. Dineshavalyadi Kuzhembu (23)
Arkavalli swarasa, Rajani, Argwadha, Krishna, Vriksha, Narikela taila
**Vranaropan** (Skin Diseases of Infective nature (Kapha-Pitta))

### 4. Durvadi Keram (24)
Durva swarasa, Coconut Oil, Yashtimadhu Kalka
**Dushta Vrana** (Infective Dermatic Complications, Chronic Ulcer, Wound, Itching)

### 5. Eladi Thailam (25)
Suksma & Bruhad Ela, Kushtha, Jatamansi, Dhanyak, Chorak, Chinchapatra, Tāgar, Jatipatra, Devaru, Agaru, Srivestak, Kunkuma, Chandana, Guggulu, Karpoora, Punag, Nāgkeshara
**Kandu, Pidaka, Kotha** (Skin Diseases like Scabies, Itches, and Eczema & Urticaria)

### 6. Kumkumadi Thailam (26)
Kumkuma, Chandana, Lodhra, Raka Chandana, Usheer, Manjishtha, Yashtimadhu, Patra, Padmaka, Nīsha, Daruharidra, Gairika etc
**Vyanga, Vaivarnya, Yuvan Pidika** (Blemishes, Dark Circles, Acne Vulgaris, Promotes Complexion)

### 7. Maltyadi Keram (27)
Malti, Karveer, Chitrak, Karanja, Coconut Oil
**Indralupta, Shira Kandu** (Alopecia, Dandruff, Hair fall)

### 8. Nalpamradi Keram (28)
Parpata rasa, Nyagrodha, Udumber, Ashwatha, Palaksha, Triphala, Chandana, Sevya, Kushtha
**Pama, Kandu, Pidika, Kushtha, Visarpa** (Skin Diseases like Eczema, Scabies, and Carbuncle)

### H) LEPAM

<table>
<thead>
<tr>
<th>Sr. No.</th>
<th>Lepam</th>
<th>Contents</th>
<th>Indications</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>Avalgujabeejadi Lepa Choornam (29)</td>
<td>Avalgu beeja, Haritala, Goomutra</td>
<td><strong>Shiwtra</strong> (Leucoderma, Discolouration Usage: - For external use only with Cow’s Urine or Hot water</td>
</tr>
<tr>
<td>2.</td>
<td>Eladi Choornam (30)</td>
<td>Ela, Kushtha, Kesar, Laja, Musta, Chandan, Karpoor</td>
<td><strong>Vata-Kapha, Visha, Kandu, Pidaka, Kotha</strong> (Dermatitis, Wheeepingczema, Psoriasis Usage: - For External use as Lep</td>
</tr>
<tr>
<td>3.</td>
<td>Sidhartaka Snana Choorna (31)</td>
<td>Musta, Triphala, Madanphala, Karanjtwak, Argwadhtwak, Kalingabeeja, Kushtha</td>
<td><strong>Kushtha</strong> (Skin Diseases, Oedema, Promotes Complexion) Usage: - As a lepa or for bath in boiled water</td>
</tr>
</tbody>
</table>
4. Rasothamadi Lepam (32)  

Rasa, Shweta Jeeraka, Krishna Jeeraka, Haridra, Maricha, Sindoora, Manashila  

Vaivarnya, Kandu, Vicharchika (Discolouration, Itching, Eczema)

**DISCUSSION:** After enlisting all the formulations, a wise physician can decide appropriate indications & use of these formulations for speedy recovery of the patient. As already stated Kushtha (Skin Disorders) require more time to heal and repeated purification measures are to be adopted frequently. But as this paper includes only conservative treatment, we can list out some formulations that have purificatory effect on our body, like regular intake of Trivrutta Lehyam, Manibhadram Lehyam induces purgative effect with added benefit of deworming. Guggulu Panchapalam Choorna is effective in quick healing of Nadi Vrana and Bhagandar specifically. Gulguluthiktkam Kwath is found useful in Santarpanjanya condition of Kushtha involving Kapha and Vata dosha. Argwadhadi kwatha which is mentioned for skin diseases, eczema, and diabetes internally can work as disinfectant and antiseptic lotion if used externally in the cases of diabetic wound and varicose ulcers for speedy recovery.

Ayaskruti is very effective in obese persons with the history of Diabetes involving complications like Diabetic Ulcer (Dushya Varna) and Carbuncles (Prameha Pidaka). Kaisor Vatkam is found useful in different complications of Kushtha involving bones and joints. Chembaruthyadi Keram is drug of choice in Balvisarpa as external application. Dhurdhurpatradi Keram is specifically used for Dandruff and scalp affected with Arunshika, Kandu, Pidaka etc. Eladi Thailam specifically for Kapha-Vata origin of skin diseases. Eladi Choornam can be applied externally where there are secretions from the skin lesions. Madhusnuhi Rasayanam if mixed with Gulguluthiktkam Ghuram will give better and quick results in deep seated and chronic skin disorders. Vilwadi Gulika which is not mentioned in above list, is an emergency drug widely used in Kerala for different poisonous bites affecting the skin as internally & externally. Pinda Thailam which is used effectively to cure painful red swelling & burning of the joints in Vatarakta patient can produce Varnya effect in so many skin lesions disfiguring the skin texture.

**CONCLUSION:**

There are number of medicines available in the market for skin disorders with equally good therapeutic effect. Depend upon the cost effectiveness, palatability and speedy recovery is the key to overcome all acute and chronic skin disorders. As the paper only includes Tradional Keraleeyan formulations, the choice remains with physicians to select from the experienced and available preparations mentioned in different classical texts.
